Dear Commissioners:I respectfully request that you oppose HR 4026, as I do. The safety and welfare of our citizens should come well before the interests of the commercial radio station owners. Having weather and traffic information available at the touch of a radio button has been of great benefit in my travels. I chose to pay for decent radio service because of the poor radio coverage in the area in which I live. Satellite radio gives me the freedom to chose when and what I want to listen to.

Thank you for your time.

Rick Hallett
